

REMARKS

Claims 9 and 10 have been amended to correct improper multiple dependency therein. Thus, no new matter has been introduced.

Attached hereto is a marked-up version of the changes made to the claims by the current preliminary amendment. The attached page is captioned "Version with markings to show changes made."

Entry of these Amendments and an early examination on the merits are respectfully requested.

Respectfully submitted,

**VERSION WITH MARKINGS TO SHOW CHANGES MADE**

**In the claims:**

Claims 9 and 10 have been amended as follows:

9. (Amended) The stereoscopic system as set forth in any one of claims [1 to 5] 1-4, 7, and 8, wherein the projection lenses for magnifying images on the stereoscreen are provided with individual optical correction elements such as curved mirrors or lenses for correcting geometrical errors, and/or half-tone, and/or color light filters for adjusting the brightness or chroma over the field of image.

10. (Amended) The stereoscopic system as set forth in any one of claims [1 to 9] 1-4 and 6-8, wherein the stereoscopic system is adapted for separate stereo-projection of parts of a common left and right image of each stereopair by separate stereo-projectors on different parts of the stereoscreen, and/or stereo-projection on the central part of the stereoscreen, and mono-projection of the left part of the left image on the left part of the screen, and the right part of the right image of the stereopair on the right part of the screen.
